

# Multisectoral Urban Systems for Health and Equity in Canadian Cities

## TRAINEE OPPORTUNITY

[WWW.MUSECOLLABORATORY.CA](http://WWW.MUSECOLLABORATORY.CA)

MUSE is a pan-Canadian research and knowledge sharing program that explores how public health organizations, municipalities, and other organizations establish partnerships to improve the health of populations living in urban areas. The **Saskatoon team** is seeking a highly-qualified trainee to contribute to a MUSE project producing research that is responsive to the needs and interests of both local governments and public health authorities, and that can help support the work being carried out by Multisectoral Partnerships between them.

### PROJECT OFFERS:

- High performing local and national teams
- Interdisciplinary work with public health application
- Publication opportunities

### SKILLS AND QUALIFICATIONS:

- Qualitative data collection and analysis
- Working with a team and independently
- Graduate degree, trained in qualitative methods
